Date: November 18, 2022

On November 17, 2022 Pete Law and Sean Libbey visited the Nupro project site to inspect the newly installed erosion control devices. We met with John Pierce. The majority of the erosion control devices met with our approval, however we did request a few modifications. These updates were subsequently completed and put in place by the project team on site.

Sean Libbey returned to the project site on the morning of 11/18/2022 to confirm all additional modifications were completed and in place per our request. Sean verified all was done as required and on behalf of the Conservation Commission provided Nupro with approval to proceed with site activity.
