SEWER CONNECTION PERMIT FEES

Deerfield has adopted a sewer connection fee based on estimated use. Estimate use is calculated in accordance with the comments and qualifications specified in the table of section 15.203 of 310 CMR 15.0.

The calculation will be completed upon submission of a Sewer Entrance Permit application.

The basic calculation is as follows:

Estimated Daily Use (Gallons Per Day) x 10 = \$ Fee

Example:

A single-family house, with three bedrooms, has an estimated water use of 330 gallons per day.

330 GPD x 10 = \$3,300

The Sewer Entrance Permit fee will be \$3,300.

Notes:

- Estimated connection fees can be provided upon request.
- Final Connection Fees will be determined by permits management staff.
- If there is any question about the validity of a sewer entrance permit fee, the fee will be reviewed.
- All fee reviews will be completed by the Public Works Superintendent or designee.
- The decision of the Superintendent or designee is final.

*Per vote of Deerfield Selectboard/Sewer Commissioners
